## Development Experience

### *Open Source Contributions*

I regularly open source datasets and code to accompany my academic publications. In addition, I occasionally do fun, standalone open source work like:

Developed a TreeLSTM in TensorFlow2: this neural network dynamically changes its topology on a per-example basis ([https://github.com/jmhessel/recursive\\_nn\\_tf2](https://github.com/jmhessel/recursive_nn_tf2))

Developed fmpytorch (150+ stars on GitHub): a cythonized implementation of second order factorization machines in pytorch, forward/backward passes implemented in C (<https://github.com/jmhessel/fmpytorch>)

Developed fightingwords for comparing word usage rate differences between corpora; used in several refereed publications (<https://github.com/jmhessel/FightingWords>)

Pull requests merged to *Keras*, and *Gensim*, and *tensorflow*

### *Technical Skills*

*Machine Learning Skills*: Various machine learning/statistical toolkits/languages (e.g. sklearn, Tensorflow, PyTorch, R, etc.). Experience working with large, multi-faceted datasets.

*Development Skills*: Object-oriented programming (Python, Java, C++), parallel programming experience on CPUs + GPUs + TPUs, experience with various languages, development environments, version control systems, operating systems.
